

EZ - MIG 307 Si

CLASSIFICATION

EN ISO 14343-A	AWS / ASME SFA-5.9	W. Nr.
G 18 8 Mn	~ ER307	1.4370

DESCRIPTION AND APPLICATION

Austenitic solid welding wire for GMAW of identical and similar stainless steels, dissimilar joints, poor weldability steels and manganese steels. Also, the wire is used for welding of elastic buffer layer at hardfacing. The high proportion of manganese makes weld resistant to hot cracking, and the structure of the weld metal is fully austenitic.
